PRESS RELEASE

September 2009

Get involved in National Water Week

National Water Week is fast approaching. Being held 18 -24 October 2009, this year's National Water Week theme is 'Securing our Water Future'.

National Water Week is designed to assist communities to take actions that help protect and conserve our most precious resource – water. The week provides special emphasis on fostering grass-roots participation and behavioural change, and consists of a national schedule of programs and events that encourage protection, rehabilitation and improvement of water environments.

Businesses, Community Groups, Schools and Councils are encouraged to run events and activities to promote water way protection and water conservation. If you are interested in finding out more about running an event, you can log on to the National Water Week website at www.nationalwaterweek.org.au and visit the 'Events' section. This section provides all of the information you need to organise your own event. You can also register your event so that it features on the National Water Week calendar.

National Water Week is managed by the Australian Water Association (AWA) in partnership with the National Water Commission, and exists with the support of the water industry and organisations who seek to promote the messages of sustainable water use and management. This year, Grundfos Pumps have come on board as a Silver Sponsor of National Water Week.

In addition to supporting National Water Week, Grundfos Pumps has been working to endorse sustainable water use practices through its sponsorship of the Water Conservation category of Keep Australia Beautiful Tidy Towns and Sustainable Cities awards programs.

Grundfos Pumps Marketing Manager, Ms Tiffany Bermingham says, "Working together with organisations such as Keep Australia Beautiful, and initiatives such as National Water Week, we hope to provide a clear, concise and consistent water conservation message to the community, and help deliver a sustainable Australian environment for generations to come."

###

About Grundfos Pumps Pty Ltd

With an annual production of more than 16 million pump units, Grundfos is a world leader in manufacturing and supplying pumps and pumping systems.

For over 25 years in Australia, the Grundfos range has allowed customers to select from pumps and pumping systems, which cover a wide range of applications across the entire water life cycle - Water Supply, Water Transfer, Water Treatment and Wastewater.

With over 150 employees, Grundfos Australia, together with local sales and service partners, are able to meet almost all customers' needs within pumping applications across the entire water life cycle.

For further information please contact Grundfos on contact-au@grundfos.com.
